2016

'Cause we don't hunch
over a code punch

This GraVITas

GraVITas is VIT University's annual TechFest and knowledge carnival which aims at empowering young minds by giving them a national platform to showcase their technical genius. Now in its 8th edition, GraVITas is spread over 3 days with over 100 events, fifty workshops and is attended by over 30,000 students from both within and outside the university. This years theme is "Sustainable social innovations". Students will be able to showcase their ideas while we provide them with a framework to transform their concepts into real world solutions.

Yuvana

Yuvana is an 8 hour event which tests a students coding ability under high stress and competition. It's main aim is to make coding fun for both coders and non-coders alike, and to show that coding doesn't have to be as difficult and daunting as it sounds. This is achieved by giving teams various tasks to achieve such as scoring points on a dart board, building towers using playing cards or even drinking shots of crushed ice before they're allowed to code for a certain amount of time. The competition is increased by interspersing the various rounds with trivia questions and the likes. Now in its 3rd year, Yuvana has seen hundreds of participants over the past two years who have thoroughly enjoyed this refreshing coding experience.

Why Sponsor Us?

Benefits for sponsors:

- **Immense outreach**, as the fest sees over **30,000 students** each year across a 350 acre campus, about 5000 of whom will be attending such a fest for the first time and will be on the lookout for opportunities and internships.
- **Sponsors will be announced** during every round of the event.
- **Pamphlets/discount coupons/cards** can be handed over to the participants during the course of the event.
- **Online publicity** on CSI Facebook page and website.
- Publicity will start **one month prior** to the fest and will continue during the fest.

Computer Society of India

The Computer Society of India is the first and largest body of computer professionals in India. We, the VIT chapter of the Computer Society India, are a multidisciplinary University Chapter with the sole aim to hone technology and push it forward. We also engage in projects, research and competitive programming. We have organized a wide range of events and competitions, both technical and non-technical.
